

## Containment Well Control Training

Vorenkamp Well Control Training in conjunction with The Energy Workforce & Technology Council is pleased to provide instruction in the SecureWell Training for the well servicing industry. The training provides instruction in the standards for effective equipment selection and purpose-drive practical/containable well control training for cased hole applications.

### Courses

- ✔ 2 day Classroom SecureWell training with exam
- ✔ Field Assessor orientation training 1/2 day supplement (final certification will be conducted by a Senior Assessor from your company)

### Why Choose Us

Learning requires a special blended environment. By facilitating innovative techniques and adaptive teaching methods, we empower our clients the "right knowledge" and practical confidence to successfully and safely conduct their duties. The unique relationship between our clients and Vorenkamp Well Control Training created our motto: "The Power of II".

- SecureWell training was developed and is supported by industry subject matter experts from six of the largest well servicing companies in the U.S.
- Training is aligned with pending API 16WS.
