

Vorenkamp Well Control Training is pleased to announce our partnership with **GryphonESP** in expanding our footprint of services in the Midland/Odessa regions. We now offer IADC WellSharp approved well control training monthly at GryphonESP's training center @ 3800 N FM 1788 Midland Tx 79707.

VWCT is an industry leader in the Well Control business with over 100 years combined experience providing well control training to the oil & gas industry. With regionally specific training to address the horizontal drilling and Workover industry, VWCT creates a unique relationship with you the client that no other vendor provides.

Learning requires a special blended environment and through facilitating innovative techniques and adaptive learning methods, we empower our clients with "right knowledge" and practiced confidence to conduct their duties safely, effectively and successfully! By establishing this unique relationship we've created the

"THE POWER OF II".

GryphonESP Services currently offers a variety of professional safety training to support the oil & gas industry. GryphonESP provides immediate experienced medical first responders & firefighters at remote locations, providing a safety net of initial measures to save lives and property until local support arrives. In addition, they deliver ongoing site safety, education and monitoring 24/7.

Our specifically designed, state of the art safety equipment and experienced personnel make site safety our only business enabling your company to operate with improved loss prevention, lower insurance costs and an enhanced safety profile. We help your company take site safety to a new level.

Partnering with GryphonESP allows VWCT to expand our coverage and includes: New Iberia, LA; Houston, TX; Midland, TX; Tyler, TX and Casper, WY.
